Nismo Offers NISMO N Attack Package Dedicated Option Package for Nissan GT-R NISMO (R35) in the U.S.

YOKOHAMA, Japan (August 10, 2015) - Nissan Motorsports International Co., Ltd is offering the "NISMO N Attack Package", a bundle of dedicated option parts for the Nissan GT-R NISMO(R35), in the U.S.

The "NISMO N Attack Package" consists of the dedicated parts that were especially developed through the time attack project at Nurburgring in Germany, where the Nissan GT-R NISMO recorded a time of 7 minutes 8.679 seconds, the fastest recorded time for a volume production vehicle. The NISMO N Attack Package was developed to achieve optimal speed and includes components such as aerodynamics necessary for superior down-force, suspension that can handle such a punishing road surface full of undulations and turbulent fluctuations, and full bucket seats essential to maintain the optimal driving position even under powerful g-force. In Japan, these parts are combined and assembled at the Nismo Omori Factory, whose mechanics participated in the time attack project, while, in the US, Steve Millen Sportsparts Inc. (STILLEN) was chosen to conduct sales as the official installer and certified sales agency.

STILLEN has a long history with Nissan and Nismo through motorsports activities, as the president and CEO, Steve Millen, was a Nissan racing driver who brought home many victories with his famous tricolor 300ZX. In addition to their racing expertise, the company has been specializing in high performance parts for a long period of time. In order to become the certified sales agency and official installer of the NISMO N Attack Package, STILLEN has been trained at the Nismo Omori Factory in Japan on all the techniques required for special assembly processes, servicing and maintenance for each N Attack Package.

Interested customers can contact STILLEN for pricing and installation at www.stillen.com
