Product note

- Because this product includes NISMO R-Tune brake pads, which have been designed primarily for circuit driving, some noise will occur.
- Although the rear pad is for a standard caliper, be sure to use a set of both front and back to ensure front and back brake balance.
- Be sure to conduct a test run before actual driving begins. After extended periods of low-speed/low-temperature driving, or if the vehicle sits for an extended period, the condition of the rotor surface and pad friction surface will change; in this case a test run should also be made.
- These parts are not intended to meet modified car inspections.
- Due to normal deterioration over time, please understand that these parts may show scorching or discoloration.
- Because these are competitive parts, in principle it is difficult to respond to claims after installation.
