

Special Tools for Clutch Disc Installation

Part	Part no.	Code	Price with tax	Price	Qty per car	Part information
Clutch Alignment Bar, SAE	ST206-RS080	A	Discontinued	Discontinued	1	Reinforced input shaft specifications
Clutch Alignment Bar, NISSAN	ST206-RS040	A	8,400	8,000	1	Genuine input shaft specifications

Features

To make positioning the splines of the clutch disc easier, two special tools are available which can insert the disc from the rear: one for SAE reinforced splines & one for standard production splines.

Specification

- Spline length: 87mm

Product Warnings

- When the position of the splines of the clutch disc are not properly aligned or if overdue force is used during assemblage, the clutch disc can be deformed. This can result in unusual or excessive wear, in blocking proper disengagement or in further damage to the clutch disc.
- Problems which are the result of errors in installation are not covered by the product warranty.
