

Intercooler

Skyline GT-R (BNR34)

Part	Part no.	Code	Price with tax	Price	Qty per car	Part information
Intercooler	14461-RSR46	B	189,000	180,000	1	Core diameter H: 280 x W:590 x D:100mm

Features

Expanded core capacity and an optimized fin pitch reduce pressure loss and maximize cooling performance. They also help reduce the burden on the turbocharger. Because surface irregularities within the side tank are practically eliminated, the intercooler allows incoming air to flow across the whole of the core. The intercooler is designed to be mounted in as vertical a position as possible. When correctly positioned, cooling performance will be even better.

Specifications

Material: aluminum

Application

Skyline GT-R (BNR34), all models.

Product Note

- When attaching the unit to a car equipped with a standard bumper, some mechanical work (removal of the screws for fixing the grille to the bumper) is required. The genuine grille cannot be used.
- To attach a genuine Nissan optional intercooler air spoiler, some mechanical work is required on the spoiler itself.

NISMO Intercooler performance data
