Part	Part no.	Code	Price with tax	Price	Qty per car	Part information
Racing Radiator Cap	21430-RS012	B	3,360	3,200	1	Outer diameter $\phi$ 45; valve operating pressure P=0.13Mpa; seal: heat-resistant silicone rubber *should not be used with vehicles with cold region specifications

## Features

The NISMO Racing Radiator Cap maintains higher internal pressure in the cooling system than the standard cap (valve opening pressure : 0.9kg/cm<sup>2</sup> \*1.2kg/cm<sup>2</sup> for Z32). It prevents the coolant from easily boiling and vaporizing (the boiling point is approximately 6°C higher than the standard cap's 0.9kg/cm<sup>2</sup> threshold) and improves cooling efficiency. The NISMO Racing Radiator Cap can also be used on vehicles with a small radiator cap (external diameter 45).

## Product Warning

- Because the NISMO Racing Radiator Cap maintains high pressure in the cooling system, be sure to inspect the radiator and hoses before installing the cap to be certain that they are not damaged and that there are no leaks. Cars are particularly prone to problems due to wear. Even if your radiator and hoses appear to be working fine at low pressure, flaws may appear at higher pressure.
- Cap can be used on vehicles with a small radiator cap (external diameter  $\phi$  45).

## Application (should not be used with vehicles with cold region specifications)
