Features

A line up of two different operating angle settings—Spec-1 and Spec-2. Choose the best one for your particular use.

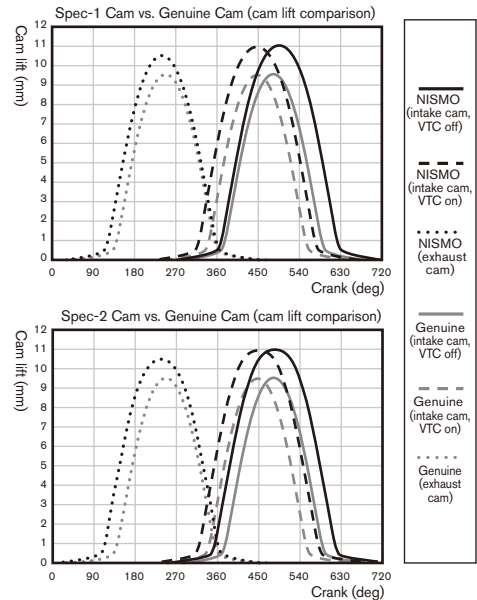

Specifications

<Spec-1>

1. Intake cam: Operating angle has been increased (238deg→276deg), as has cam lift (9.5mm→11.0mm) and the central angle (125deg→138deg)
2. Exhaust cam: Operating angle has been increased (240deg→256deg), as has cam lift (9.5mm→10.5mm) and the central angle (112deg→120deg)
3. During VTC operation (crank angle at 50deg), the overlap at VTC off is 8deg, 58deg at VTC on

<Spec-2>

1. Intake cam: Operating angle has been increased (238deg→284deg), as has cam lift (9.5mm→11.0mm) and the central angle (125deg→135deg)
2. Exhaust cam: Operating angle has been increased (240deg→268deg), as has cam lift (9.5mm→10.5mm) and the central angle (112deg→115deg)
3. During VTC operation (crank angle at 35deg), the overlap at VTC off is 18deg, 53deg at VTC on

High-Lift Camshaft Set (Spec-1)
