

# RB26DETT Engine Parts

## Air Flow Meter !

Part	Part no.	Code	Price with tax	Price	Qty per car	Part information
Air Flow Meter	22680-RR580	B	36,750	35,000	2	Same shape as Genuine part

### Product Note !

- Use of the engine control unit is a prerequisite to the use of the air flow meter. If a production engine control unit, or the engine control unit for a different air flow meter is used, airflow measurement may be incorrect, causing a lean air-fuel ratio, or an advance of ignition timing, resulting in damage to the engine.
- Use of this product may be very difficult for those not certain about the compatibility of the engine control unit.

	Measurable airflow volume	Output (reference figures)
22680-RR580	2400kg/h	MAX 775ps
RB26DETT Genuine part	1400kg/h	MAX 450ps
Other manufacture's parts	1640kg/h	MAX 550ps
