

RB26DETT Engine Parts

GT Con Rod !

Part	Part no.	Code	Price with tax	Price	Qty per car	Part information
GT Con Rod, Spec1	12100-RRR4A	B	21,000	20,000	6 *1	Center length 119.5mm, compression height 30mm, for piston
GT Con Rod, Spec2	12100-RRR4B	B	23,100	22,000	6 *1	Center length 121.5mm, compression height 28mm, for piston

*1 Sold in units of 6 (one engine set)

Features

When using along with the NISMO crankshaft and appropriate pistons , this connecting rod makes a 2,771cc engine displacement possible*2. High-strength SNCM439 nickel-molybdenum is used, with an "I" construction to provide both light weight and high strength*3. Spec 1 is for genuine NISSAN RB26 pistons, while spec 2 is for use with 28mm compression height pistons.

*2 Application for permission for engine modification is required when using these parts for on-road use (in Japan only).

*3 1.6 times than standard.

Product Note !

- Application for permission for engine displacement volume rework may be required in some locations when using these parts for on-road use.
