

RB26DETT Engine Parts

Air Inlet Pipe

Pipe extending from the turbocharger housing to the joint section

Part	Model	Part no.	Code	Price with tax	Price	Qty per car	Part information
Air Inlet Pipe	BCNR33, 260RS, BNR34	14460-RS597	B	162,750	155,000	1	

Features

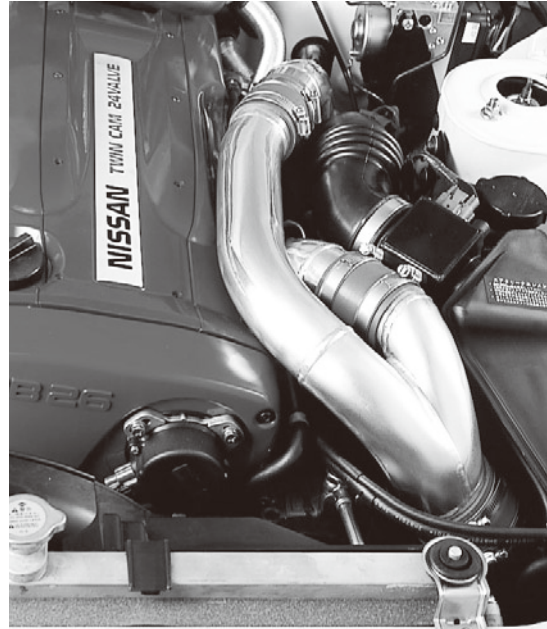

Compared to standard part, it smoothes the airflow from two turbochargers, reducing pressure loss and improving engine response. A welded aluminum pipe structure was used to smooth the interior of the pipe, reducing inflow air resistance and weight. To reduce weakness to pressure in the joint sections and increase heat-resistance and increase durability, highly rigid, swell-resistant, heat-resistant silicon rubber was adopted.

Specifications

- Pipe section: aluminum pipe, buffed finish (painting not required)
- Joint section: reinforced silicon (blue, with NISMO logo)

Product Note

- After installation, the main pipe will with the air cleaner duct. Heat the duct with a hair dryer or other heat source and bend it 10 to 15mm in a concave shape until it clears the pipe.
- For the BNR34, replacement of the air cleaner duct with an R-tune air cleaner duct (part no. 16554-RSR46, ¥34,650) will allow for installation without additional modifications.
- Installation of this part will increase boost pressure slightly. Be sure to adjust boost after installation.

for BNR34
