Oil Separator

Part	Model	Part no.	Code	Price with tax	Price	Qty per car	Part information
Oil Separator	For BNR32	11830-RSR25	B	49,980	47,600	1	
	For BCNR33,BNR34	11830-RSR45	B	49,980	47,600	1	

Features

Blow-by gas exiting the combustion chamber can mix with engine oil and return during the intake stroke. While under normal condition oil collects in the intercooler, blowback can cause parts related to intake, such as the airflow meter, to become dirtied by oil. The NISMO oil separator separates the oil from the blowback gases returning from the cylinder head during the intake stroke, decreasing the amount of oil deposited in the intercooler. Because it is designed to return the separated oil to the oil pan, the oil separator also decreases motor oil consumption. The blowback gases are returned to the engine and are not released to the atmosphere, making this a valuable device for automobile inspection procedures.

Specifications

- ϕ 50 round pipe
- Attachment bracket, pipes included
