### Product Note

- Always replace both left and right link and Bush at the same time. If only one side is replaced, the left-right balance of the suspension is lost, so even when repairing the vehicle replace both sides.
- When replacing the rear link, rear axle-side Bush (no. 14 and 15) should be replaced with NISMO units at the same time. Replacing only the link will not draw out the full performance potential of the suspension.
