

# Under-Floor Reinforcing Bar

Strengthening the under-floor section to provide greater stability

Vehicle	Model	Part no.	Code	Price with tax	Price	Qty per car	Part information		
Skyline GT-R	BNR32 all models	Front	54422-RSR25	E	42,000	40,000	1	Connects the body and steering rack mount	Drilling of holes not required (for front use in BCNR33 and BNR34, drilling is required at one point each on the left and right side members)
		Trunk	79175-RSR25	E	36,750	35,000	1	Installs inside rear trunk	
	BNR33 all models *	Front	54422-RSR35	E	42,000	40,000	1	Front: after exchange with Genuine front cross bar, mount is added to steering rack	
		Center	76440-RSR45	E	36,750	35,000	1	Center: after exchange with Genuine center cross bar, connected to rear suspension stay	
	BNR34 all models	Front	54422-RSR45	E	42,000	40,000	1		
		Center	76440-RSR45	E	36,750	35,000	1		

\* exact Autech version.

## Features

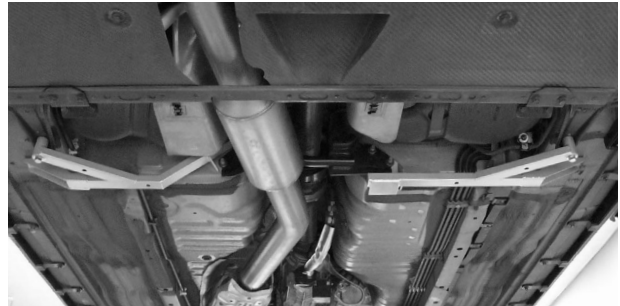

These reinforcing parts help to increase the vehicle's rigidity against twisting and bending. Installation will provide a more linear sense of stability. These bars do not become the minimum ground height clearance point.

## Specifications

Material: Aircraft-grade duralumin (for S15, BNR32 trunk)  
High-carbon steel (for BNR32 front, BCNR33, BNR34)

Installation, BNR34 front

Installation, BNR34 center

Installation, BNR32 front

Installation, BNR32 trunk
