9	Rear Shock Absorber Bush	56218-RRZ30	E	630	600	2	

Features

- The rubber used in genuine parts has been hardened for a super-rigid, durable, race-proven bush.
- Provides an improved, direct and responsive feeling in the front when steering, as well as improved lateral rigidity and grip feeling in the rear when cornering.
- While individual parts are available, we suggest use as a set for the highest results.

Product Note

- These are parts designed for use in Sunday racing competition; sound vibration and ride feel in normal use will be complicated through their use.
