

# Front LSD (for Skyline GT-R)

Part	Part no.	Code	Price with tax	Price	Qty per car	Part information
Front LSD Kit	38420-RSF16-A	A	123,900	118,000	1	1.5-WAY installation kit (oil seal , O-ring , two bearings included)

## Features

The initial torque is set low for smooth entrance into turns when cornering. The ideal number of slip surfaces and optimal cam angles were adjusted to provide powerful front-drive power when distribution moves to the front such as when exiting a corner using E-TS. Because initial torque is low, the front LSD does not chatter.

## Specifications

- Plates (slip surfaces): 8 Plates per side
- Initial torque: 29.4Nm (3kgf·m)

## Applicable models

- BNR32
- BCNR33
- BNR34
- WGNC34 (Stagea 260RS)

## Pressure ring cam angle

Type	Drive side	Coast side
GT-R Front LSD, 1.5-WAY	45° (55°)	1°

- A 55° drive-side cam angle is installed to the pressure ring.  
Greater drive power can be obtained by dismantling and readjusting the plates.

## Product Warning

When installing the front LSD, the transmission case must be trimmed slightly.
