

# LM GT4 Application Chart (Tire sizes are for reference purposes)

## Elgrand

Model	Wheel type	Size	Offset	P.C.D	No. of holes	Part no.	Code	Price with tax	Price	Reference tire size	Part information
E51	LM GT4	18 × 7.5J	40	114.3	5	40300-RN928-SL/BR/WH	F	76,650	73,000	235/50-18 *	2WD vehicles: cannot use flat-type center cap 4WD vehicles: cannot use center cap

\* When installing 18-inch wheels, it is suggested that steering rack spacers (48600-RS1E0, Dealt by Nissan) also be installed. When installing larger wheel for the Elgrande (E51), such as size 235/50-18, it is possible that, depending on the brand of tire used and the individual difference in vehicles, parts within the wheel housing may come in contact with the tire when backing into a garage, or in other situations where the wheels are turned fully over. Steering rack spacers will prevent this interference.

### Steering rack spacer

Part no.	48600-RS1E0
Code	—
Price with tax	Dealt by Nissan
Price	Dealt by Nissan
Specifications	Set of 2 (left and right), thickness 6mm

Notes on installation of steering rack spacers

- Installing the spacers decreases the front wheel steer angle by 3° (our research figures), increasing the minimum turning radius. The new minimum turning radius is 5.9 meters, the Genuine figure 5.6 to 5.7 meters.
- Installation involves removal of the rack boots. If the boot clamp wires cannot be reused, please purchase part no. 48055-10V00 (Genuine Nissan part, two needed per vehicle).
